Dewmar International BMC, Inc. (otcqb:DEWM) Exceeds Projected 1st Quarter 2014 Earnings by 250%

HOUSTON, TX, Mar 19, 2014 (Marketwired via COMTEX) -- Dewmar International BMC, Inc. (otcqb:DEWM) ~~DEWM, -8.71%~~ ("Dewmar" or "Company"), a leading provider of consumer brands to global markets, announced today that the Company has exceeded its original projection of 300% revenue growth for Q1-2014 compared to Q4-2013 by 250% with roughly two weeks remaining in the quarter. Dewmar experienced a significant increase in Lean Slow Motion Potion sales after fulfilling a number of purchase orders from repeat customers. In a February 5, 2014 press release, the Company projected that it should see at least a 300% increase in sales compared to previous quarter. As of today's, date the previous quarter comparison stands at a 550% increase.

"This is a very positive start to our 2014 year as we have shattered our aggressive 1st quarter growth projections that we set at the beginning of the year," said Dr. Marco Moran, CEO of Dewmar International. "The number would have actually been larger had we been able to fill two additional purchase orders, as we ran out of product due to a production run glitch at our new bottler that created a shortage in our largest batch run in over a year. These unfilled orders simply give us a head start on Q2-2014 earnings," Dr. Moran continued. "Additionally, Dewmar saw a significant increase in its online sales orders for Q1-2014."

In order to remedy new beverage production facility manufacturing issues on future batches, Dewmar has began negotiations with another bottler in a region much closer to most of its repeat customers. This move should reduce the Company's shipping costs thus improving profitability. With Dewmar expecting to launch Kush Cake brownies in the second quarter, along with other potential hemp-based consumable goods later in the year, Dewmar appears to be on pace to far surpass our original revenue expectations for 2014.
